

12V

Professional autonomous starter with integrated charger for starting all vehicles equipped with 12 V batteries.

A high-performance stand-alone starter

Equipped with a «**high performance**» lead-acid battery (starting: 640A at 1V/c and 1800A at peak battery), the Gyspack PRO 700 is ideal for starting light vehicles, vans, tractors and trucks.

Ideal for onsite interventions

- ✓ With its small size and its weight of 12kg, the Gyspack PRO 700 **is easily transportable on site and without effort.**
- ✓ **1.40 m of cables** for optimal user comfort.

For safe use

- ✓ Protection against reversal polarity thanks to an audible warning and an indicator light.
- ✓ Equipped with a fuse to protect your vehicle against over voltage or short circuits and prevent sparks when connecting the clamps.
- ✓ Protected against handling errors, vehicles defective with a 200 A fuse.

Complete unsupervised charging

- ✓ Recharges 100% of its power from the mains, unattended, even if permanently connected (6 A charger - intelligent 7-step charging curve),
- ✓ Visualization of the state of charge thanks to three LEDs.

Memory backup function

- ✓ 1 cigarette lighter socket for holding or saving vehicle memories (15 A fuse) when changing batteries.

A protected cover

- ✓ The GYSPACK PRO 700 is equipped with corner pads. They protect the cover from impacts when working in demanding environments (on site or in the workshop).

After each use

Intelligent charging curve: 7 steps

- 100% automatic charging
- Extends the life and performance of the internal battery
